# Gosnold
## ON CAPE COD

The Gosnold Reaching Out program is a resource for family members and loved ones affected by addiction. It assists the family at all stages of addiction through education, intervention, and support.

Information and education forums help family members gain a basic understanding of the signs and symptoms of addiction, treatment options, and stages of recovery.

An educated and supportive family has a positive impact on treatment outcomes. Family support enables family members to share their experiences, gain hope, and learn how to make changes that sustain recovery.
